

# Samui Systems

Welcome to **Samui Systems**

**Samui Systems** is a rapidly growing mobile technology firm specializing in the development and implementation of reliable, scalable, available IT solutions through the use of Open Source as well as commercial technologies.

Our philosophy is very simple - we implement and build **Systems That Work** for the e-Economy. We accomplish this with a great methodology and good people. Our group of IT professionals is among the most experienced and highly qualified in the industry. Application of our client methodology ensures smooth project execution and the transfer of knowledge and technology to the client once our work is complete.

We deliver comprehensive solutions to our clients, geared to their success in a mobile-based world. Thanks to the experience level of our professionals, **Samui Systems** excels in working with our clients complex business requirements.
